

Dec 14, 2020

To Whom it may concern

John Doe came in for a substance abuse assessment on Dec 14, 2020 and then to complete it on the 16th. He has had some substance abuse in his past, in High School and College. He has since then used Marijuana and alcohol. He had a couple of Alcohol charges while in College. He reported that this was more than 15 years ago. This last incident with the Vyvanse and Percocet lasted for 8 months according to the client. He reported that he had a hard time staying awake at work on his shifts and then was having a hard time getting to sleep. It became a bad cycle. There has also been substance abuse in the form of marijuana in his family (his father). came up as Low probability for having a Substance Dependency Disorder on the SASSI test.

The recommendation is GOP, (General Outpatient Treatment) at a Substance abuse treatment Center. This is recommended so that he can get some education, relapse prevention, and learn how to deal with hard things in a healthier way.
